

# **GUARANTEED USER FRIENDLY VIDEO**

Amstrad's new 'User Friendly' UF 20 video recorder is so easy to use, we guarantee that within 5 minutes you will be able to make a timed recording using the remote control, or your money back. As long as there is a tape in the video there are only 4 steps to follow on the colour coded remote control:

1. Press 'Program Timer'.
2. Select channel.
3. Select start time.
4. Press send.

That is all you have to do. When the UF 20 finishes recording it will even rewind to the start of your selected programme, not necessarily the start of the tape.

The UF 20 is also a very sophisticated video with a host of

features concealed behind the flip down front panels. There is a full function 8 event/28 day timer as well as Long Play to double the recording time of your tapes, auto start, memory rewind and a quick start mechanism.

The tape mechanism is in the centre of the deck, a balanced position for more stable recording and play back. Auto-tracking has also been included and together these features help give you the best possible picture.

Amstrad has developed for you the first truly User Friendly video.

Amstrad brings the best entertainment home to you.

**Amstrad**

Your money back if you can't programme the UF20 in five minutes using the remote control. \*
